INSTRUCTIONS FOR USE

Open the unit by inserting the key into the lock and insert 2 LR20 ALKALINE batteries. Take the cap off the refill. Place the refill inside the device. At the back plate of the proanplus auto sanitizer, introduce an evaporation strip by the upper opening, leading it through the guides until reaching the deposit with the chemical solution. Select the frequency mode (30 or 60 days). The LED's will light up when the unit is working properly. Close the unit.

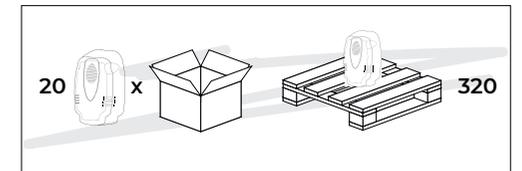

PRECAUTIONS

- Install the unit in such a manner that it is at an optimal height to carry out its function.
- The unit can only be installed by trained personnel.
- Prior to switching on, check that there is not humidity or wet components near to any electric components.
- Never leave a dead battery inside the unit.
- Take the battery and refill out when not using the unit for a long period.
- Change the evaporation strip each time you change the refill.
