MATERIAL: ABS Plastic
COLOR: White, black.
FILTER: HEPA

ELECTRONICS

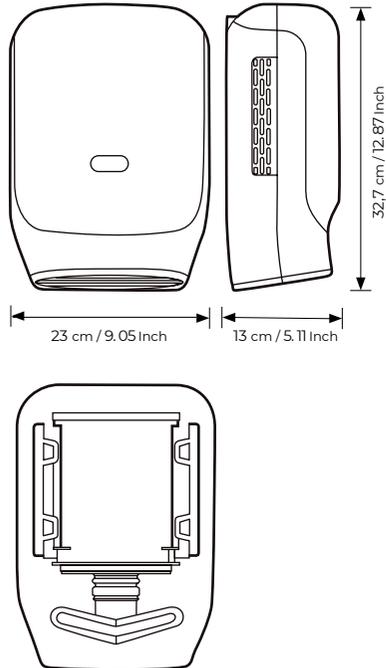

POWER SOURCE: 220 V - 50 Hz / 110 V
POWER: 1450 W
WORKING CURRENT: 6.6A - 2.9A

PACKING ATTACHMENT

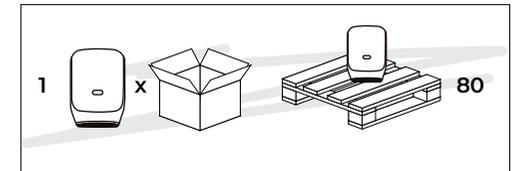

Chart	Function	Amount
	Allen key	1
	Screws 35mm	5
	Plugs 37,5mm	5
	User manual	1

HOW TO USE

The blue Led will light after turning on the product. The temperature sensor will adjust the parameters according to the environment. Later the blue Led will turn off, at this moment choose the hot air. Place your hands under the sensor, the dryer will eject hot air, once you remove your hands, the dryer will stop. If you turn on the hot air this will come out automatically. The recommended temperature is lower than 23°C. It is recommended to change the filter every 25,000 cycles approx. or every 3 years. Once all these aspects have been checked, the device can begin to be used. Place your hands under the sensor. Rub and move your hands back slowly to dry your fingers. The device will continue working while moving your hands. The device will stop working automatically if used more than 60 seconds.
