

DATA SHEET

REF. INSECIN3

INSECT CATCHER LAMP PROVOL RECTE

GENERAL

WARRANTY : 2 years.
ACTUATION METHOD: With electricity (connect to plug).
METHOD: Attracts insects and they get trapped in the adhesive film.
EFFICIENT IN SPACES UP TO: 60 - 150m2
HOW IT WORKS: with an adhesive film.

AMBIENCE

TEMPERATURE RANGE: 5/40°C
HUMIDITY RANGE: 20-90%

PROVOL RECTE LAMP

MOUNTING: Suspended from the ceiling or hang on the wall.
NET WEIGHT: 4,000g
GROSS WEIGHT: 4,500g
DIMENSIONS: 47 x 35 x 17,5cm / 18. 50 x 13. 77 x 6. 88 inch.
MATERIAL: Stainless.
COLOR: Stainless.
LAMP TYPE: 2 Fluorescent UV BL 15W T8

ELECTRONICS

ENERGY CONSUMPTION: 35W (aprox.)
POWER SUPPLY: 230V / 50 Hz / 110V

REFILL

ADHESIVE FILM BAG: 6 units.
LIGHT BULB BOX: 1 units.

FEATURES

Allows mounting on the ceiling or wall. High efficiency lamp. No smell, no noise, no pesticides. Silent - Efficient - Economic. It works with an adhesive film. The lamp attracts insects thanks to its ultraviolet light and these are trapped in the adhesive film. The adhesive film should be changed once a month. Once the adhesive film has been removed, it can be reused for a pests study, which allows greater control of the type of insects to be exterminated. Ideal both for the exterior and the interior, where insect control must be done with discretion: bars, restaurants, cafes, shops, receptions, offices, hotels, schools...

FEATURES ADHESIVE FILM

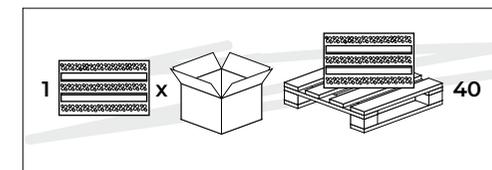

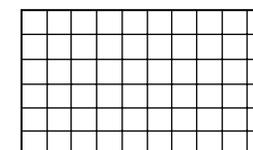

· Adhesive of high resistance to UV light that prevents the detachment of the adhesive or the loss of adhesion of the plate. · Adhesive with anti-drip formula with high resistance to adverse environmental conditions. · Uniform application of the adhesive that guarantees a consistent adhesion throughout the plate. · Varnished base to avoid the absorption of the adhesive. · Contains specific attractants to guarantee a greater capture. · Siliconized paper that ensures easy removal without affecting the glue. · The adhesive film is not a toy. Keep out of the reach of children. · Wide grid (2.5cm x 2.5cm) to facilitate the counting of insects. · Our cardboard plates are 100% recyclable.

Register No.: AN-04-DM-01
Version: 002
Date: 13/10/2021

ADVICES

Store the equipment in a dry place at a temperature between 11oC and 33oC. By fulfilling these conditions, the film can be kept for a maximum of two years, without changing its properties. Adhesive duration in the unit: 20 to 30 days under normal conditions and exposed to ultraviolet light. Resistant to ultraviolet light.
