

REF: 900, 901

PROBIO ODOR ELIMINATOR GEL REFILL

FEATURES

ASPECT: Solid.
ODOR: Slightly citrus.
COLOR: Orange.
WEIGHT: 25g.
MATERIAL: Polymer gel.

APPLICATIONS

INDICATED FOR: Broad-spectrum odor eliminator that neutralizes nitrogen compounds, sulfur compounds, and other acids responsible for unpleasant odors. The GEL format allows for effective and convenient application in environments where odor-causing particles are present. Since its dispersion into the air occurs continuously, it achieves greater reach and effectiveness.

ESTABLISHMENTS: It is indicated for treating odors emitted by, for example: garbage, toilets, sewers, containers, pipes, pets, etc. It can be used in environments with human or animal presence. *

MARKETING: Can be customized with label / logo.

OPERATION AND COMPOSITION

Our Probio Gel is a polymer specially designed for the gradual release of different odor-eliminating molecules. During its exclusive manufacturing process, the different layers of the gel retain the odor-neutralizing agents, which are then released progressively into the environment. This makes it a highly versatile product suitable for all types of environments and different unpleasant odors.

It does not mask odors by covering them with another fragrance; instead, it directly captures the molecules that cause bad odors and removes them from the air. In this way, unpleasant odors are eliminated from the environment or treated surface.

PROPERTIES

Fast-acting and effective product against unpleasant odors. It combines different chemical mechanisms for the control and neutralization of bad odors. It does not mask odors; instead, it completely eliminates them, leaving the air with a light natural fragrance.

Probio Gel is a high-tech designed product specially formulated for the elimination of environmental unpleasant odors. It is a convenient and safe gel block with a broad spectrum of neutralization. It is ideal for environmental application due to its effective dispersion in the air. This product combines several technologies to achieve effective odor neutralization, leaving a more pleasant and healthier environment.

AVAILABLE FORMATS

General Gel Polymer
Tobacco Gel Polymer

***Tobacco Gel Polymer:** Specially indicated for treating tobacco odors from smoke areas, bars, etc.

Register No: AN-03-DM-01
Version: 002
