

REF: NEBPBIO

PROBIO ODOR ELIMINATOR NEBULIZER REFILL

FEATURES

ASPECT: Liquid.

ODOR: Slightly citrus.

COLOR: Colorless.

DENSITY: 0,980-1,000g / ml.

PH: Approximately 7,00.

MATERIAL: Polyethylene terephthalate and high-density polyethylene.

SOLUBILITY: Soluble in water.

APPLICATIONS

INDICATED FOR: Broad-spectrum odor eliminator that neutralizes nitrogen compounds, sulfur compounds, and other acids responsible for unpleasant odors. The nebulization format allows for effective and convenient application in environments where odor-causing particles are present. Since its dispersion into the air occurs as a "mist," it achieves greater reach, even accessing the most difficult-to-reach corners.

ESTABLISHMENTS: It is indicated for treating odors emitted by, for example: garbage, toilets, tobacco, sewers, containers, pipes, pets, etc. It can be used in environments with human or animal presence.

MARKETING: Can be customized with label / logo.

REFILLS

REFILLS: 1L, 5L, 20L, 950L.

OPERATION AND COMPOSITION

Our concentrated liquid for nebulization is of organic and biodegradable origin, therefore harmless to the environment. In addition, they are completely safe for human health and for our pets. This makes them highly versatile products for all types of applications. They do not mask odors by covering them with another fragrance; instead, they directly capture the molecules that cause bad odors and remove them from the air. In this way, unpleasant odors are eliminated from the environment or treated surface.

PROPERTIES

Fast-acting and effective product against unpleasant odors.

Safe and harmless formula for both human health and the environment.

It combines different chemical mechanisms for the control and neutralization of bad odors.

It does not mask odors; instead, it completely eliminates them, leaving the air with a light natural fragrance.

Concentrated liquid specially formulated for eliminating unpleasant odors in **Nebulizer** format. It is ideal for environmental application due to its effective dispersion in the air. This product combines several technologies to achieve effective odor neutralization, leaving a more pleasant and healthier environment.
