REFILLS

REFILLS: 500ml, 5L, 20L, 950L.

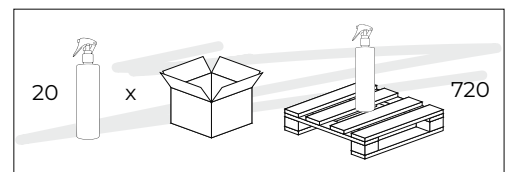

OPERATION AND COMPOSITION

Our odor eliminators are of organic origin and biodegradable, therefore harmless to the environment. In addition, they are completely safe for human health and for our pets. This makes them highly versatile products for all types of applications. They do not mask the odor by covering it with another fragrance; instead, they directly capture the molecule that causes the bad smell and make it disappear from the air. In this way, the unpleasant odor is eliminated from the treated environment or surface.

PROPERTIES

Fast-acting and effective product against bad odors. Safe and harmless formula for both human health and the environment. It combines different chemical mechanisms for the control and neutralization of unpleasant odors. It does not cover the smell, but completely eliminates it, leaving the air with a soft natural fragrance.

Odor neutralizer in a 500ml **Roomspray** format, ideal for application in the air and on surfaces. This product combines several technologies to achieve effective neutralization of bad odors, leaving a more pleasant and healthier environment.
